SIGNAL PROCESSING

# Cumulative contents of Volume 57

## Volume 57, No. 1, February 1997

**Papers**

P. Strobach
Square Hankel SVD subspace tracking algorithms ..... 1
K. Delibasis, P.E. Undrill and G.G. Cameron
Designing texture filters with genetic algorithms: An application to medical images ..... 19
T. Akgül, A. El-Jaroudi and M.A. Simaan
Multi-scale deconvolution of sensor array signals ..... 35
I. Cohen, S. Raz and D. Malah
Orthonormal shift-invariant adaptive local trigonometric decomposition ..... 43
L. Deng and X. Shen
Maximum likelihood in statistical estimation of dynamic systems: Decomposition algorithm and simulation results ..... 65
V. Koivunen, N. Himayat and S.A. Kassam
Nonlinear filtering techniques for multivariate images – Design and robustness characterization ..... 81
C.-K. Chen and C.-C. Tseng
Minimax design of digital allpass filters using multiple exchange eigendecomposition algorithms ..... 93

## Volume 57, No. 2, March 1997

**Papers**

M.J. Vrhel, C. Lee and M. Unser
Fast continuous wavelet transform: A least-squares formulation ..... 103
T. Cooklev, A. Nishihara and M. Sablatash
Regular orthonormal and biorthogonal wavelet filters ..... 121
A. Nasipuri and S. Tantaratana
Nonparametric distributed detector using Wilcoxon statistics ..... 139
A. Doucet and P. Duvaut
Bayesian estimation of state-space models applied to deconvolution of Bernoulli–Gaussian processes ..... 147
W.S. Kafri
Phase and delay approximation for 1-D digital IIR filter in the $L_\infty$ norm ..... 163
T.-S. Lee and T.-T. Lin
Adaptive beamforming with interpolated arrays for multiple coherent interferers ..... 177
C. Lu, S. Joshi and J.M. Morris
Parallel lattice structure of block time-recursive generalized Gabor transforms ..... 195

Elsevier Science B.V.

## Volume 57, No. 3, March 1997

**Papers**

S. Lawson and M. Anderson
The design of 2-D approximately linear phase filters using a direct approach ..... 205
K. Ichige, N. Otsuka and R. Ishii
An automatic design procedure of IIR digital filters from an analog low-pass filter ..... 223
A. Carini and E. Mumolo
Fast square-root RLS adaptive filtering algorithms ..... 233
I. Cohen, S. Raz and D. Malah
Orthonormal shift-invariant wavelet packet decomposition and representation ..... 251
A.K. Nandi and D. Mämpel
Development of an adaptive generalised trimmed mean estimator to compute third-order cumulants ..... 271
P. Sircar and S. Sharma
Complex FM signal model for non-stationary signals ..... 283
H.J. Butterweck
The independence assumption: A dispensable tool in adaptive filter theory ..... 305

**Author index of Volume 57** ..... 311

**Cumulative contents of Volume 57** ..... 313
